Complete Home Control With Your Own Smart Home Devices

Your smart home and security should complement your lifestyle, not complicate it. Only Clare lets you personalize and customize your smart home and security experience as easily as you pick your cabinets and countertops. Clare works with many smart devices you may already have, this includes lighting, thermostats, door locks, garage door openers, surveillance cameras, and even multi-room speakers from some of the biggest brands people know and love.

Read on to learn about what's included with your new home and what additional packages you can add that help keep your family and home safe, secure, entertained, and comfortable.

Save Energy • Feel Safer • Be Entertained • Worry Less

Clare Base Package – Included With Your New Home!

The Clare smart home experience begins with the Base Package. Featuring the ClareOne Panel, this package is included* as a standard amenity with the purchase of your new home. You can further expand your smart home and security experience with additional packages and smart devices from some of the most popular brands you know and trust like Yale, Chamberlain, Ecobee, Nest, SONOS, Honeywell, and many more.

- ✓ ClareOne Security and Smart Home Panel
- ✓ Mini Door/Window Sensor
- ✓ Motion Detector
- ✓ Clare Video Doorbell
- ✓ Installation and white glove service

Complement your smart home and security features with any of these packages.

Safe and Secure Package

Experience true security and peace of mind knowing your family is safe 24/7 with the Safe and Secure package. These additional sensors can help alert and protect your family and home from **Intrusions** and **Home Disasters** caused by leaky faucets.

- Door & Window Sensors
- PIR Motion Sensor
- Glass Break Sound Detector
- Moisture and Flood Sensors
- Labor, installation, and programming

Home Away Package

See what's happening around your home, from next door or across the globe. Receive instant notifications from smart events the moment they happen or pull up previous recordings. You can even **Automate** your smart lights to turn on if motion is detected!

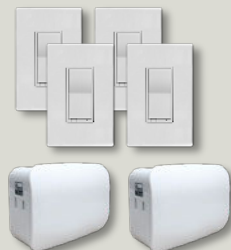

- Outdoor Cameras
- POE Injector
- 32GB Micro SD Card
- Smart Light Switches
- Labor, installation, and programming

Smart Lighting Package

Smart lights go beyond eco-savings on your electric bill. From settings the perfect ambiance to letting intruders know someone is home. Your smart lights can be **Scheduled** to turn on/off, added in Custom **Scenes**, and included as part of **Automations**.

- Smart Light Switches
- Smart Light Dimmers
- Plug-in Lamp Dimmers
- Labor, installation, and programming

Enhanced Network Package

Your network experience is just as important as your smart home and security features. The Enhanced Network package features the latest network technology to ensure you experience uninterrupted coverage throughout your smart home.

- Araknis Router and Access Points
- 5-Port Network Switch
- Networking Pre-wire
- Battery Backup/Surge Protection
- OvrC Network Services
- Labor, installation, and programming.

Works with your favorite Voice Assistants

Add your favorite Amazon Alexa or Google Assistant speakers to easily control your ClareOne home using your voice!

Use your voice assistant to control custom scenes you created such as a Good Night scene or Movie Scene.

Control connected devices such as thermostats, lights, access, and other devices!

Want to control your security system or audio? Include additional devices into a custom Scene for ultimate control.

Make a *Scene...*

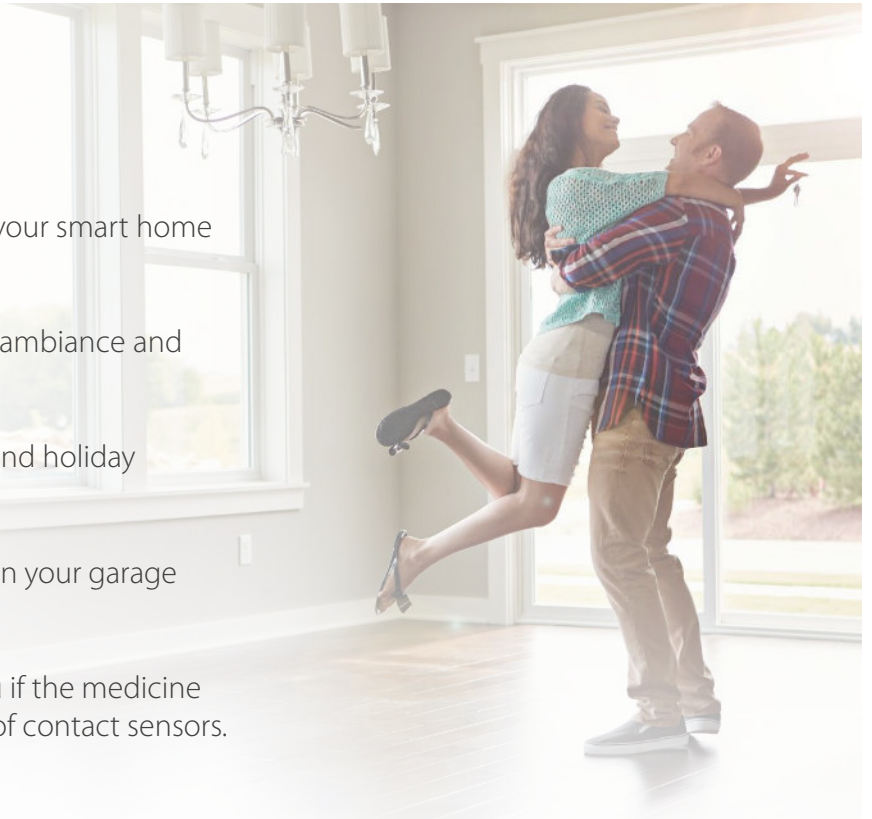

ClareOne gives you the freedom to customize your smart home experience for you and the entire family.

Create custom **Scenes** that will set the perfect ambiance and temperature for a fun-filled movie night!

Schedules can automate your outdoor lights and holiday decorations for every season and event.

Get creative with **Automations** that can turn on your garage lights the moment your garage is opened.

Create custom **Notifications** that can alert you if the medicine cabinet or safe has been opened with the use of contact sensors.

IP Power Control

Take the guess work out of network issues when they eventually rear their ugly head. Combining surge protection with advanced real-time network health checks, your WattBox will automatically reboot your network if a problem is detected.

Remote Management Tool

The OvrC Tool gives you remote access to your system, letting you effortlessly fix small problems before they become a bigger hassle.
